Water Resistant

Lightweight

MOLLE
Compatible

Designed for breachers and shotgun operators, this MOLLE-compatible pouch securely carries up to seven 12-gauge shells in a low-profile design. Two split flaps offer fast, individual shell access while also allowing for full coverage to protect unused rounds from dirt and debris. Both flaps are removable and reversible, giving you full control over your reload process. Thanks to its Helium Whisper® attachment system, you can mount the pouch either vertically or horizontally for optimal ergonomics. Built from durable, mission-ready materials, this pouch streamlines shotgun reloads so you can stay focused on the task at hand.
