MOUNTING

Warning: If these tools are not available it is best to have the rail installed by a gunsmith in order not to risk damaging the firearm.

1. Place the front of the top half of rail in to the handguard cap behind the sight post.

2. Pull back delta ring and slide back end of the top rail completely in to the delta ring until it snaps in. If it won't go in all the way, check to make sure the front is properly seated.

3. Repeat steps 1 and 2 with the lower half of the rail on the underside of the rifle.

INSTALLING KEYMOD RAIL SECTIONS

1. Loosely assemble keymod rail section with keymod nuts and bolts.

2. Line up keymod nuts with the large part of the keymod holes on the rail (make sure the rails are aligned with the raised sections on the underside to the rear.)

3. Insert the keymod nuts in to rail and slide section forward.

4. Tighten bolts on keymod rail

WARNING

Unload Firearm before installing the rail. Before handling the Edge Keymod Rail read and understand the contents of your firearm's manual, and the Firefield manual. Follow all standard safety precautions and procedures during firearm operation.

- ALWAYS check that the chamber of your weapon is clear before mounting the Edge Keymod Rail.
- Failure to follow standard firearm safety precautions and procedures is dangerous and may result in serious injury, damage to property, or death
