MAGNIFICATION

TSN-99 PROMINAR SERIES

30-70x WIDE ZOOM

TSN-880/770 PROMINAR SERIES

25-60x WIDE ZOOM

Dual magnification engravings now feature on the TE-11WZ II

Dear business partners,

With the recent introduction of our new flagship spotting scope, the TSN-99 PROMINAR, it has become necessary to mark Kowa SYSTEM compatible eyepieces for use with TSN-99/880/770 scopes with two different magnification readings.

This is necessary because the focal length of the TSN-99 PROMINAR is different to that of the focal lengths of TSN-880/770 PROMINAR spotting scopes.

The focal length of the scope dictates the magnification of the zoom eyepiece. Therefore an increased focal length on the TSN-99 PROMINAR increases the effective magnification of the eyepiece.

The "new" version of the current **TE-11WZ** will be renamed to **TE-11WZ II** and for those of you who already received the initial shipment of the new TSN-99 Kits you will be able to see the new magnification engravings on the eyepiece. Optically and mechanically the eyepiece is exactly the same and the change is only cosmetic.

Please note: TSN-99 PROMINAR kits will ALWAYS be supplied with TE-11WZ II.

Pending orders of TSN-880/770 will be supplied with the original TE-11WZ for as long as they are supplied from our factory.

When the original **TE-11WZ** version is sold out, your pending orders for TE-11WZ will be shifted smoothly over to **TE-11WZ II** in our system and we will inform you accordingly.

TSN-99/880/770 EYEPIECE PRICING

Product	Description	UPC	Dealer cost	MAP	MSRP
TE-11WZ II	25-60x (TSN-880/770) 30-70x (TSN-99) wide zoom eyepiece	879110001227	\$550.00	\$749.00	\$819.00
