Ideal for a wide range of applications including hunting, shooting, home defense or tactical, this lightweight but powerful flashlight features a selector switch with 3 modes: 600 lumens, 100 lumens and strobe. Its exceptionally bright Cree® T6 LED bulb delivers a solid beam of light essential for emergency situations or decoying specific targets. The Sightmark® SS600 Flashlight includes red, green and blue filters to maximize product use. Green filters assist in map reading, while red filters help to preserve night vision and assist with varmint hunting, helping to avoid being detected by targeted prey. Blue filters assist in illuminating blood trails.

Featuring an aircraft-grade aluminum construction and type II mil-spec anodizing, this high-intensity flashlight is extremely durable, resistant against corrosion and heavy recoil. With a weather resistance rating of IP67, the unit is dustproof and waterproof, ready for the harshest climates and tactical situations. The SS600 Flashlight is designed with a 3-prong, glass-breaking bezel, equipping operators with a powerful self-defense tool to escape out of windows when desperately needed. It also includes a lanyard for secure attachment to a user's wrist, belt loop or backpack.
