

NEW

TRIJICON RMR® TYPE 2

(Ruggedized Miniature Reflex)

The redesigned and upgraded electronics in the new RMR Type 2 passed extensive endurance testing, providing optimal performance when mounted on a pistol slide and/or other small arms platforms.

Included in the new RMR Type 2 is a button lock mode, and battery saving features, which make this optic ideal for concealed carry and Law Enforcement use. The Trijicon RMR is extremely versatile as a primary optic on handguns, rifles, carbines and shotguns. When paired with a magnified optic, the RMR is an excellent solution as a secondary CQB optic, and as a backup sight.

LED

Adjustable LED

DEPENDABLE ELECTRONIC DESIGN

- ruggedized battery contacts and electronics ensure performance and survivability in harsh environments

BUTTON LOCKOUT

- sets RMR into automatic mode to prevent accidental adjustments

BATTERY CONSERVATION MODE

- automatically adjusts aiming dot to ambient lighting conditions after 16.5 hours

UNIQUE PATENTED HOUSING SHAPE

- military-grade aluminum alloy forged housing shape diverts the force of an impact away from the lens, greatly increasing the durability of the sight
