

# Trijicon RMR<sup>cc</sup>

Ruggedized Miniature Reflex  
for Concealed Carry

Split seconds matter. The new Trijicon RMR<sup>cc</sup> has a thinner, lower-profile design that reduces the risk of snags for a faster and easier draw. Although smaller, the RMR<sup>cc</sup> keeps all the great features of the RMR. Easy-to-use buttons, a common 2032 battery with up to 4 years of illumination, and a wide variety of mounts to fit today's popular concealed carry pistols, the RMR<sup>cc</sup> is the clear choice in personal defense.

Shoot more accurately with a single, crisp, clear aiming point superimposed on your target. Once zeroed in, where you see the dot is where your bullet will impact. Your eyes never need to leave the threat which allows you to stay focused on the situation.

Born from the industry-leading Trijicon RMR<sup>®</sup>, the new RMR<sup>cc</sup> has the same reliability you expect, designed for concealed carry. The slimmer design fits a variety of pistols providing comfort during everyday carry. Carry confidently with a sight that increases your speed, improves your accuracy, and keeps your focus on the target.

## Confidence in Carrying

- 1 Everyday Reliability**
  - ruggedized electronic design
  - unique shape protects lens from drops and bumps
  - 4-year battery life – ready when you need it
- 2 Designed for Defense**
  - snag-free design, easier to carry, easier to draw
  - multiple illumination options for any lighting condition
  - target-focused shooting with both eyes open
- 3 Easy to Adopt**
  - slim, low-profile design with easy-to-use buttons
  - mounting adapters for popular pistols
  - uses common CR2032 battery

## The Science of Brilliant<sup>®</sup>

At Trijicon, we are bound by a commitment to industry-leading research, design, and testing to seek innovative aiming solutions that constantly redefine “brilliant.” That’s why Trijicon products are subjected to the below testing methods.

Alaska-to-Africa Tested | Solid Zero Tested | Drop Tested  
Vibration Tested | Immersion Tested
