

ENHANCER

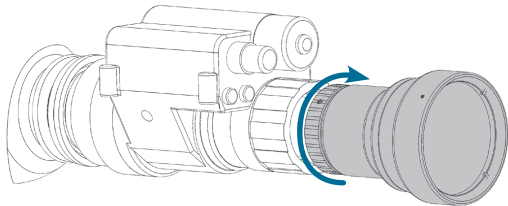

PVS-14 6X Magnifier

Setup Guide

Installation and Operation

Ensure that the PVS-14 objective threads and Enhancer threads are free from debris. Then install by rotating clockwise until Enhancer is snug. Be careful not to overtighten as this may cause damage to your PVS-14. Objective focus will function normally. Note that the Enhancer is designed to fit most PVS-14 products that feature a standard 1.2 – 32 thread pitch with minimum depth of 1/8.”

Warranty

TRYBE™ products are made for performance and durability and are covered by a limited lifetime warranty. For full warranty information please visit www.TRYBEdefense.com. Please reach out to our TRYBE™ Customer Care team at 1-800-511-4801 or email sales@TRYBEdefense.com in order to process a warranty claim.
