

MICRO6X

MAGNIFIER

OVERVIEW

Easy on, easy off, and built to fit seamlessly onto your rifle, the Micro6x Magnifier delivers an incredibly compact 6x optical system that takes your red dot farther, maximizing the versatility of your weapon. Ultra-compact, the Micro6x Magnifier still provides durable, robust functionality that stands up to abuse in the field. The cam lock system of the adjustable flip mount engages or disengages with direct pressure, allowing you to raise and lower the magnifier quickly and easily. You also get everything you need to mount up, right out of the box: Take your pick of three mounting heights (absolute co-witness, lower 1/3 co-witness, and 1.93 inches with included riser) and hit harder, farther than you ever thought possible.

WHY DID WE MAKE THIS MAGNIFIER?

For users who want the true 1x performance of their red dot or holographic sight, but also want to stretch their effective range with a 6x magnifier.

WHAT IS NEW TO THE MICRO6X VS THE MICRO3X MAGNIFIER?

- 6x Optical System
- 1.93" riser included*

*The 1.93" riser is now available for order for the Micro3x Magnifier. Call 1-800-4VORTEX to order one.

WHAT ARE THE TOP USES FOR THIS PRODUCT?

The top use will be recreational shooting.
