ZT 0470

A DMITRY SINKEVICH design

This handsome new design from ZT and Dmitry Sinkevich begs to take pride of place in your collection. Not that the 0470 is a safe queen. Far from it. It's a highly practical, easy-to-EDC design that handles a wide range of tasks and looks good doing it. The blade is wear and corrosion resistant CPM 20CV high-chromium stainless steel. The handle is titanium with an eye-catching marbled carbon fiber insert that adds a sophisticated touch to the look of this knife.
